

Stainless Steel-Cabinet "U" handles

SPECIFICATION

Types

- Type A: Mounting from the back (threaded blind bore)
- Type B: Mounting from the operator's side

Stainless Steel

d1 = 20: Solid material

d1 = 28: Tube-Ø 28 x 2

- AISI 304
- matt shot-blasted

Threaded bush / Mounting stud Stainless Steel AISI 303

Grub screws (Type B) d1= 20: DIN 914-M5-6-NI d1= 28: DIN 914-M6-8-NI

INFORMATION

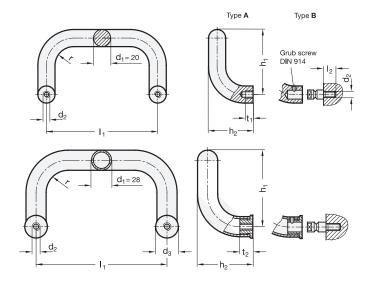

Stainless Steel-Cabinet "U" handles GN 426.6 can be mounted from the back (type A) as well as from the operator's side (type B). In this case the stud is first screwed in from the machine side and then the handle is pushed on and secured with the grub screw.

Both mounting methods allow the mounting of a pair of handles in opposite position. This method could be used e.g. on doors (double handle). In general, a mounting stud with special length I2 might be required.

The manufacturing process (bending) allows the production of special lengths in relatively small quantities.

TECHNICAL INFORMATION

- Stainless Steel characteristics (see page A26)
- Load rating information (see page A35)
